

## DeSelco Pumps at the IFAT 2008 in Munich

At the shared BMWi exhibition stand which was sponsored by the BMWi (Federal Ministry of Economics) **DeSelco** could convince the visitors with its positive displacement spiral pumps.

**DeSelco** could get in contact with important customers and found further distribution partners. Apart from this other visitors could get an impression about the new pump technology.

The feedback showed that there is a great demand of new pumps in the most various fields of industry.

The original expectations were excelled by far. As a conclusion it can be said that all participants were very satisfied with the presentation of **DeSelco** at the fair and that the event will boost the future development. Consequently the production of new models with spiral mechanism will be soon started in order to meet the great demand.
